HARVARD ARRIVES AT RED TOP

Crimson Oarsmen Here for Final Three Weeks Before Races With Yale on June 30—Varsity Eight All-Veteran.

Red Top, June 12.—Harvard's crew quarters took on life tonight on the arrival of the squad from Cambridge, Mass. As soon as the men could change their clothing they were out on the water. The freshmen came by train from New London and some varsity men came up on the launch John Harvard. The eight paddled about, the varsity rowing there, two miles and the freshmen nearly the same distance—the four followed the eight for a short practice. Hard practice will be tomorrow and all the crews will be out on the river twice a day, under conditions permitting, from now until the day of the race. All the men seem to be in good condition. They will have two weeks for some hard work and trials over the four mile course, and then four days for the final training. The race will be rowed on Friday, June 30, a day later than the date usually selected.

Thus far the crew has not been over the full distance on time. Before the race with Cornell the crew was given several long, easy paddles, but all their hard work was in short stretches, at a high stroke. After the Cornell race the men were given an easy time for several days, and last week they were sent on long stretches at a low stroke. Some days the crew rowed more than ten or a dozen miles in an afternoon, paddling for the greater part of the time at 25 or 28 strokes to the minute. Probably the week the men will be tried out more than once on the four mile course at a racing clip.

Lacking Power at Finish of Stroke.
The one noticeable defect in the Harvard crew this year has been a lack of power and drive at the finish. To some it has seemed that the men were going too far back on the finish of the stroke so that it was impossible for the men to keep their full power sustained until they were ready to come out for the next stroke. The men are sitting up nearer the perpendicular at the finish and the oars are taken out of the water when the full power of the stroke is exhausted. There seems to be a less stroke until the freshmen stopped and waited the return of the varsity, which went down to the three mile mark.

A Crew of Unbeaten Veterans.
Harvard's eight has two great factors in its favor. The men are all in the best possible condition to begin the hardest part of the season's training and their oarsmen are men who have never known defeat by Yale.

The conditioning of the men is due in large part to Dr. Ladd, and Coach Wray has also had this part of the development of great credit. Call and see them and be sure also to examine the incomparable Rapid Instantaneous Gas Water Heaters, furnishing at the mere turn of a faucet an unlimited supply of hot water at any moment of the day or night.

THE Varsity Boat.
The eight is made up as follows: Strokes: Goodale, 6; Cutler, 6; Strong; Withington, 6; Morgan, 6; Metcalf, 6; Stratton; bow, Balch, and coxswain.

FINANCIAL AND COMMERCIAL.
POWERFUL BEAR CLIQUE
Exerts its Influence and Changes Buying Into a Selling Movement.

New York, June 12.—For a time following the opening of the stock market today trading was active and prices advanced vigorously. The demand virtually the entire list of active stocks, and the market appeared to be well established on a level which showed substantial gains. This advance was held fairly well during the first hour with no appearance of the pressure which had been exerted so recently during the first days to give rise to various reports of the operations of a powerful bear clique. Before noon, however, selling was resumed on a heavy scale and the tone of the market changed suddenly. United States Steel and the Gould stocks exhibited marked weakness and nearly all of the important railroad and industrial issues shared in a reaction which cancelled gains and in some cases resulted in net losses. During the remainder of the day the market was held in check and was largely professional in character. Toward the close trading became more active and prices were bid up sharply.

Stocks of the Gould and southern lines were the weakest in the list, could not be reflected in the closing as to the action of the directors tomorrow in regard to the dividend on Denver and Rio Grande preferred. Reports of continued hot dry weather in the cotton belt, despite predictions of rain, depressed the shares of southern roads. Almost the only stocks to exhibit sustained strength were those of the copper group. Amalgamated Copper, Anaconda, Utah Copper, Tennessee Copper and American Smelting all responded to the improvement in the copper metal market and reports of larger domestic and foreign demand. The conflicting movements in the market represented a continuation of the hesitation and alternate periods of strength and weakness which were prevalent throughout last week. Uncertainty as to the outcome of investigations of corporations and as to the maintenance of dividend rates, reports of the effect of drought in the south and southwest, and disquieting accounts of the determination of powerful operators to "break" the market, particularly United States Steel, are advanced in explanation of the southerly condition of the market. Underlying these factors, however, is the belief that the outlook for the general industrial situation is still clouded.

The annual report of Westinghouse Electric, showing a new high record for both gross and net earnings, had little effect on the stock, which declined sharply after an early rise. Stock shares of the recent improvement of electrical shares and the announcement that no dividend would be paid at present prevented a further gain.

Bonds were irregular. Total sales, \$4,000,000. United States bonds unchanged on call.
